

ASPECTA™
A NEW DIMENSION IN FLOORING

REVISE (RECLAMATION) PROGRAM

WHAT CAN I SEND TO ASPECTA™ FOR RECYCLING?

Any Aspecta Commercial Dryback LVT (Luxury Vinyl Tile) waste accumulated during the installation process can be sent to Aspecta for recycling. Thus, Aspecta™ Five, Aspecta™ One, Aspecta™ One Ornamental, and Aspecta™ Tilt & Tones dryback products are eligible for recycling under the Revise Program. Additionally, any vinyl flooring removed as part of the installation process may also be eligible for recycling. If the flooring that will be removed is a non-Aspecta product, it must be tested before it can be reclaimed by Aspecta. Products with too much filler, hazardous content, or hazardous adhesive may not be eligible. It is the contractors' responsibility to keep the recycled content clear of foreign debris. Do not combine Aspecta Commercial Dryback LVT installation waste with any old flooring that is also being sent for recycling (as approved by Aspecta), as charges may be incurred if the product is received with intermingled jobsite debris.

HOW DO I SEND MY FLOOR TO ASPECTA?

Call Aspecta Customer Service toll-free at 855-400-7732 or email recycle@aspecta flooring.com. We will then send you a short application, which will be used to collect all pertinent information, such as: jobsite location, square footage, dock access, etc. You will then need to return the completed application form, along with samples of any non-Aspecta products you wish to have reclaimed. Please allow adequate time for this in your planning. Our goal is to make this a simple process for you.

HOW AND WHEN WILL I START SHIPPING THE RECLAIMED VINYL FLOORING?

Once your reclamation-request is approved, we will send out nylon bulk-sacks for your vinyl recyclables. You will need to place these bulk-sacks on a pallet prior to filling them (pallet(s) to be provided by contractor). We strongly encourage the reuse of existing pallets from the jobsite. Each bulk-sack will hold roughly 1 ton (2,000 lbs.) of material. To initiate pickup after the job is completed, simply call the Aspecta Customer Service phone number on this document, or call the phone number printed on the bulk-sacks. We will handle all of the logistics of the return, though the jobsite contractor may need to help the carrier pick-up the reclaimed products.

WHERE DOES THE PRODUCT GO AFTER LEAVING THE JOB SITE?

Reclamation should always make good environmental sense. Material reclaimed by Aspecta will be shipped to our facility in northwest Georgia, where it will be sorted and stored. Aspecta will coordinate with its recycling partners to ensure proper end-of-life management.

IS THERE A COST ASSOCIATED WITH THIS PROGRAM?

No, this program is provided free of all charges with the purchase of Aspecta Commercial Dryback LVT flooring. Metroflor's goal is to divert this waste material and any eligible vinyl flooring from entering landfills. There may, however, be a fee if the product is received with intermingled jobsite debris.

ARE THERE GEOGRAPHICAL LIMITATIONS WITH THIS RECLAMATION PROGRAM?

At this time, the program is available for all projects that are located within the Continental United States.
